

**BRIDGESTONE RADIAL TIRES** Bridgestone radials offer the ultimate in performance and superior technology for the ultimate riding experience. From advanced tire design methods to formulations from Moto GP tire development, Bridgestone radials offer champion performance both on and off the track. Innovative tread designs, compounds, and construction designs offer superior grip and stability in all conditions.

# BRIDGESTONE

## BT016 ULTRA-HIGH PERFORMANCE RADIALS

- Maximum performance of all sport bikes
- New multi-compound technology
- Grip performance in every aspect – braking, maximum side grip in cornering, and strong traction at the exit of a corner.
- Front tire features dual compound (3LC) to provide grip in all riding modes. The center compound offers linear handling while the shoulder compound secures high grip and solid contact feeling.
- Rear tire features a new triple compound (5LC) The center compound offers good stability, the shoulder compound transfers power to the road with strong traction while the edge compound offers strong side grip and solid contact feeling at extreme lean angles. L shaped grooves enhance shock absorption and rear-end steering.
- The steel MS-BELT construction applied to front and rear tires absorbs sudden impact from bumps and offers high stability and tremendous line-holding in corners.
- Compares to Dunlop Qualifier, Michelin Pilot Power/Pilot Sport HPX, Pirelli Diablo/Rosso, Metzeler Sportec M-3/M-1

Front	Part #	Retail
130/70ZR16	120029	164.95
110/70ZR17	120046	153.95
120/60ZR17	120063	162.95
